

FACILITIES PLANNING

The Board is responsible for the regular operation and orderly development of its physical plant. The Board will concern itself with both short and long range planning as it relates to the properties of the school district. The building program will be designed to provide adequate facilities to conduct educational programs.

The Board will follow the policy of having before it at all times a long-term building program to serve as a guide for capital improvements. In developing a long-range program, the Board will monitor:

1. The evaluation of existing facilities in terms of capacity and function.
2. The projection of life expectancy of facilities and maintenance costs.
3. Enrollment projections and community development patterns.
4. Site availability and acquisition.
5. Changing instructional requirements, curriculum, and services.
6. Availability of construction funds.

This program will be subject to systematic study and revision. The respective construction projects will be acted upon individually when proposed for implementation.
