

ELEMENTARY SCHOOL CLASS SIZE

The Board believes that class size is an important factor in the overall effectiveness of teaching and learning. The administration will make every effort to maintain class sizes in grades K-6 which best promote teaching and learning in all elementary classrooms. It shall be the goal of the Board to limit student enrollment to 23 students in grade kindergarten through grade three and 26 students in grade four through six. Students may be enrolled in other classrooms and schools when the class size exceeds the goal or when all class sizes in a particular grade exceed the class size goal in an effort to equally distribute the number of students per class.
